CAIS 117: Intro to Programming with Python

Fall 2023

Code For Good Activity 2: Radical Futures

This is a group assignment. Work with 1-2 other people.

Learning Objectives:

- Imagine how tech can support a radical future

Part 1

Today we listened to the first part of the CITP Special Event: Tech in Conversation- Imagining Radical Tech Futures:

https://mediacentral.princeton.edu/media/CITP%20Special%20Event%3A%20Tech%20in%20Conversation-%20Imagining%20Radical%20Tech%20Futures/1_1ehcsg31

We heard from three experts in technology: Annika Hansteen-Izora, AM Darke, and Ashley Jane Lewis. All three of these experts work in the tech space, from a lens of imagining radical futures with tech.

Discuss the part of the video we watched with 1-2 other people. Talk about the following:

- What work resonated most with you? Why did it resonate?
- What from the presentations made you think about something you don't usually think about? Will your new awareness change how you interact with tech?
- What does a radical tech future look like to you?

Neatly write up the highlights of your discussion and submit as a group on PLATO.

Submission

Save your document as a PDF and submit it on PLATO as a group.
